TECNOSICUREZZA BECOMES A CORPORATION

We are pleased to announce that on 2nd May 2019 Tecnosicurezza has changed its legal nature from s.r.l. (limited liability company) to S.p.A. (Corporation).

At the same time, the share capital was increased from 98,000.00 € to 200,000.00 €.

This is an important sign of growth and strengthening of our company, always aimed at improving the service provided to its customers.

The legal and operative headquarters in Via Cesare Battisti 276, San Giovanni Lupatoto (VR) Italy remains unvaried as of the Tax code, VAT number and Company Register Number.

NEW FEATURE ON TECHMASTER, MINITECH, DIGITECH

With a view to continuous improvement of our products, new functions and / or technical improvements are regularly added to our product.

In this edition of the newsletter, we present a new feature particularly useful to manufacturers of safes, which allows you to set a reminder for the scheduled maintenance of the safe.

This function is available on TechMaster, MiniTech and DigiTech safe lock systems.

The reminder consists of a two-page message that is shown on the display of the keypad when the lock is closed.

The message is displayed after a period of time set during the setup of the lock and this period can vary from 1 month up to a maximum of 144 months.

The first page of the message is fixed, and shows the message "Safe service reminder". The second page of the message can be programmed as you wish during the setup of the lock and its maximum length is 32 characters divided into two rows (16x2).

The transition between the first page of the message and the second page is automatic and each page is displayed for about 4 seconds.

The visual message is supplemented by a sound signal consisting of a series of beeps. This sound signal can be silenced by pressing and holding for 3 seconds the "arrow" button on the keypad.

The reminder message can be deactivated by means of a specific software, which also resets the time counter.

This new feature brings multiple benefits as it consents you to offer a useful additional service to your customers and at the same time, it helps you to increase your service-related business.

INSTRUCTIONS UPDATE

With the aim of providing more and better support, we have been renovated to the installation instructions of the products. The renovation was not limited to a mere restyling but it has been a total renovation.

The first difference that stands out is the new graphic layout: information is better organized and easier to consult. There are also new images to make it even easier to understand the operations to be performed to install the devices.

Lastly, the texts have also been modified and are now more complete and offer more detailed information.

The new instructions are already available in Italian on our website (www.tecnosicurezza.it) and will soon be available also in English.

The restyling will not stop with the installation instructions but will gradually be extended to all manuals.
