

Pulse

DESIGN THAT ATTRACTS ATTENTION

Whether protecting cash drawers in busy retail environments or securing assets in hotel back-offices, Pulse delivers proven electronic lock performance with a design that complements customer - facing spaces.

In boutique hotels, flagship retail stores, and luxury hospitality environments, the safe is rarely hidden away. It sits inside walk - in closets, beneath reception counters, behind concierge desks, and within guest suites - spaces where every detail is curated and every surface considered. Pulse is built to belong in those spaces.

The keypad comes in three options:

Satin-chrome, metal black, or black ABS versions, giving safe manufacturers flexibility to align Pulse with different vault aesthetics across hospitality, retail, and banking installations.

The circular keypad blends with the safes it secures rather than interrupting them. Pulse reads as part of the furniture, not a piece of equipment bolted onto it.

Locks & Security Systems

Behind that quiet exterior, Pulse handles the realities of retail and hospitality operations.

The programmable **time delay** (1 to 99 minutes) lets managers align access timing with shift changes, cash pickups, and end-of-day reconciliation, slowing down opportunistic attempts without disrupting legitimate workflows.

The **open window** function (1 to 19 minutes) defines exactly when authorized users can complete an opening, and the **penalty** protects assets after repeated failed attempts — useful in environments where keypads sit within reach of guests, customers, or seasonal staff.

The **10-user** version is well suited to operations with rotating personnel: hotel front-office teams handling guest valuables, retail managers and assistant managers sharing access to back-office safes, or duty managers covering multiple shifts.

Each user operates under individual credentials, with an **override user** available for senior staff.

Dual mode requires two authorized users to be present for opening; providing meaningful control for high-value cash rooms, luxury retail stockrooms, and jewelry counters.

Silent alarm and **remote disable opening** connect Pulse to the wider alarm system, supporting duress response without drawing attention on the sales floor or in the lobby.

Software and Documents

Keypad

- 10 alphanumeric keys
- Keypad test
- Red LED
- Buzzer
- Battery compartment
- Dallas key reader
- 4 configurations selectable from keypad

Power supply

- 9V alkaline battery
- Battery box
- Power adapter

2 User Lock

- Manager
- 1 user
- Time delay
1 – 99 minutes
- Open window
1 – 19 minutes
- Penalty
- Audit trail of 100 events
(without time and date)
- Factory code check
- Hardware reset

10 User Lock

- Manager
- 8 users
- Override user
- Time delay
1 – 99 minutes
- Open window
1 – 19 minutes
- Silent alarm
- Remote disable opening
- Penalty
- Dallas keys
- Dual mode
- Factory code check
- Hardware reset
- Audit trail of 100 events
(without time and date)

Locks

- SwingBolt**
- DeadBolt**
- LatchBolt**
- MotorLock**
- Motor LatchBolt Lock**
- MotorLock Push&Pull**
